1. A man takes his car to a hotel. Upon reaching the hotel, he is immediately declared bankrupt. Why?

Answer: The man is playing Monopoly. He lands on a property with a hotel and doesn't have enough money to pay the rent.

2. A sundial has the fewest moving parts of any timepiece. Which has the most?

Answer: An hourglass, with thousands of grains of sand.

3. What is unusual about the following words: revive, banana, grammar, voodoo, assess, potato, dresser, uneven?

Answer: Take the first letter of each word and place it at the end. It will spell the same word backwards.

4. What makes this number unique -- 8,549,176,320?

Answer: It contains each number, zero through nine, in alphabetical order.

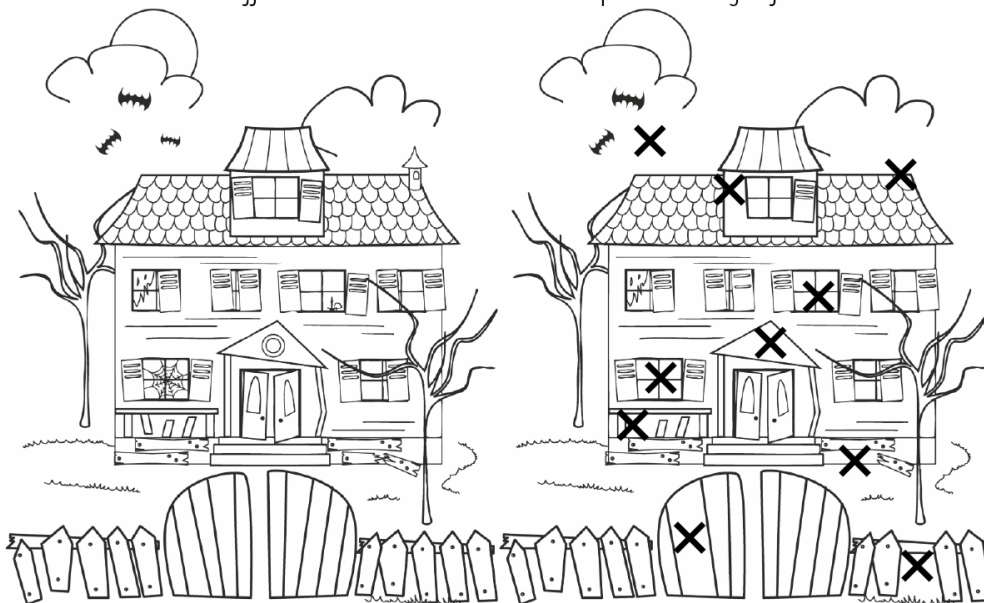

5. Put a coin into an empty bottle and insert a cork into the neck. How can you remove the coin without removing the cork or breaking the bottle?

Answer: Push the cork down into the bottle. Then shake the coin out.
